

**INTEGRATED NATURAL RESOURCE MANAGEMENT (INRM)  
IN THE PRODUCTIVE, NATURAL AND FORESTED LANDSCAPE OF NORTHERN  
REGION OF CAMBODIA**

**JOB DESCRIPTION**

**I. Position Information**

Job Title:	<b>Land Management Specialist</b>
Reports to:	<b>Project Director</b>
Contract Type:	<b>National Consultant (NC)</b>
Duty Station:	<b>Phnom Penh</b>
Expected Places of Travel:	<b>Kampong Thom, Siem Reap and Preah Vihear provinces</b>
Contract Duration:	<b>November 2020 to March 2021</b>

**II. Background**

The INRM project objective is to promote integrated landscape management for the conservation and sustainable use of biodiversity, natural resources and ecosystem services in the northern part of Cambodia. The intent is to generate multiple landscape benefits including effective conservation of globally threatened species and high conservation forests, improve management of natural resources and ensure the maintenance of ecosystem services. It is aimed specifically at improving the management of protected areas and ensuring their financial sustainability, enhancing the productivity of production and agricultural lands and improving local livelihoods. Increasing demand for forest, agricultural and wildlife products, crop land and agriculture monocultures, and infrastructure and transportation development has accelerated in recent years thereby, rapidly changing the landscape with consequential threats to biodiversity and ecosystem services. The project is thus aimed at addressing these multiple threats by harmonizing socio-economic development, sustainable management of land, forests, natural resources and biodiversity conservation through an integrated management approach, with water as a catalyst, in Northern Landscapes of Cambodia. To achieve these, actions will be taken to – strengthen policies and institutional capacity at the national and sub-national levels to ensure the integration of biodiversity and ecosystem services in sector and sub-national socio-economic development planning.

This will be achieved through three inter-related components that are focused on addressing existing barriers, these are:

- Component 1: Systemic and institutional capacity for integrated landscape management;
- Component 2: Effective management of Protected Areas and surrounding riparian and multiple use production landscapes in Northern Cambodia;
- Component 3: Knowledge management, gender mainstreaming, learning and M&E

**III. Scope of Work**

The Land Management Specialist will be recruited based on an open and competitive process. The specialist will be hired under the Project Component 1 (Output 1.2) to conduct an assessment and analysis and mapping land and agricultural degradation along with the inclusion of the support guidance for developing integrated land use planning through the integration of biodiversity conservation and ecosystem services into sub-national planning and management systems.

#### IV. Duties and Responsibilities

The work of the National Consultant (NC) will be in Phnom Penh for meeting with key stakeholders and will travel to the provinces such as Kampong Thom, Siem Reap, Preah Vihear and other provinces as necessary or identified by Ministry of Environment to validate and/or collect additional information. This will include, but limited to:

1. Conduct desk review on agricultural degradation land along with mapping exercises,
2. Data collection and analysis on the findings;
3. Development of recommendation for further activities;
4. Draft an assessment report to PMU for review;
5. Present the finding at the national consultation workshop and BTWG meeting;
6. Finalise the assessment report and submit to Project Director for approval;
